Improving drinking water quality

www.lifealchemy.eu

With the contribution of the LIFE Programme of the European Union

LIFE16 ENV/ES/000437

Up to now...

In October 2017, LIFE ALCHEMIA Project started. Two **coordination meetings** took place during this month: Kick off meeting of all LIFE16 Projects in Brussels on the 17th of October.

Kick-off meeting with the whole consortium of the Project, which took place on the 25th of October in Almeria Provincial Council's facilities .

Social media of the Project are already operating. You can follow us through Twitter, Facebook and our YouTube Channel.

The printing of the **dissemination material** (folders, brochures, etc.) is in process.

The Project has been begun to present by attending several **events** like “Smart Water 2017”, which was hold in November 2017 in Alicante or “Partenalia European Session”, hold in December 2017 in Sevilla.

Water samples from the treatment plants in which the pilot plants will be placed in order to optimize the operation conditions of the plants, are being characterized.

The surveys concerning the drinking water treatment plants that contain natural radioactivity are already ready to create our **data-base**, thus allowing the increase of the number of stakeholders.

Next...

The project will continue to be presented in several events.

The beginning of the **design and building** of the pilot plants is planned for the next months.

Participar

We will keep **searching for observers** of the Project! LIFE ALCHEMIA kindly invites you to be an observer of the Project. In that case, if you represent or manage a treatment plant of drinking water, you just have to answer the brief **survey** that appears in our website (www.lifealchemy.eu)
